See More About Me!
mikegeorge.org

I've always enjoyed working with computers. Early on in High School I started repairing electronic equipment including Laptops, Desktops, and iPods. Soon after, I found a field that I enjoyed even more than computer repair, Application Development. I genuinely enjoy being able to create custom applications from scratch and improving other businesses simultaneously.

SKILLS

- HTML, PHP, JavaScript, jQuery, C#, C++, Java, SQL, Ruby
- Microsoft Office, Windows 7, Photoshop, Illustrator
- Linux Web Server Administration and Management
- Computer Repair and Troubleshooting, Customer Service
